OBJECTIVE

Passionate front-end engineer with technical expertise from the School of Accelerated Learning. Dedicated to transforming imagination into reality by creating user-friendly digital experiences. Driven to build awesome websites and apps, I enthusiastically embrace challenges and aim to contribute meaningfully to the evolving world of digital development.

EXPERIENCE

March 2024 – Present
Frontend developer in Synilogic tech private limited.

- Developed responsive user interfaces using React.js, HTML, CSS, and JavaScript.
- Crafting app mockups and prototypes in Figma, collaborating with other designers to create visually engaging and user-friendly web applications & mobile apps.
- Collaborating with teams to refine ideas, focusing on the user experience to make sure the final product is not only functional but also enjoyable to use.

June 2021 – Aug 2022
Shift in charge in Svaar process solution pvt ltd.

- Proficiently managed equipment and evaporation process.

[Dec 2020 – May 2021]
DET – Diploma engineer trainee in Ansun multitech ltd.

- Operated and maintained electroplating process and equipment, including tank management.

PROJECTS

Astrology Kundli – Website .

- Spearheaded the design and smooth implementation of the entire frontend architecture for displaying Kundli and other astrology-related information.
- Integrated API Services to fetch astrological data and Built PDF Generation Functionality.

  Technologies: React js, Css, Redux toolkit

Ai Astrology – Website

- Developed a responsive website frontend that provides AI-powered astrology predictions.

  Technologies: Html, CSS, Java script, bootstrap, Aos
  Visit at: aiastro
